

Dear [REDACTED]

We are glad that during the Covid-19 epidemic, Lohaslore has provided us a viable solution for long-lasting antibacterial and antiviral products.

The photocatalyst application to the common areas including lifts and entrance door handles in our premises, as well as all the meeting rooms at our headquarter was very successful. Under our recent spot test to those coated surface (application in April 2020), the test result is promising. All the tested surface remains clean and the tested value are within your guaranteed value.

We hope to work with you and your company again in future and wish your business continue success and prosperity.

Thanks.

Best regards,

[REDACTED]
Senior Technical Manager
